

November 2003

**GNN Starguide III Contact Closure Cheat Sheet:**

Relay closures are fired with all GNN program elements. The relay pin outs are as follows:

Contact Closures

Connections to Port A (Digital I/F)  
Connector: DB-15 Female

Closure	Starguide Pins	Function
0	2 & 10	A Channel Net Start
1	3 & 11	Mandatory Local Rejoin
2	4 & 12	Currently Unused
3	5 & 13	Friday Night Finals Local Break Start

E.G., we start each GNN program element with a Starguide III 0 closure and end it with a 01 closure. You just need to wire off of the card as described above.

You can use the following Starguide Menu instructions to check the relay status via the Starguide display window to confirm their triggering:

Starguide III relay check status instructions

Port menu  
Enter  
Provider  
Right arrow  
Card settings  
Enter  
Relay port  
Enter  
Relay status  
Enter
